SKILLS

Vue | React | Angular | Typescript | Javascript | PHP | Golang | Python | Kotlin | Mysql | AWS | Magento | SASS | CSS | Mobile First | Google Firebase | Node | Kubernetes | Docker | MySQL | PostgreSQL | PL SQL.

WORK EXPERIENCE

Techmates Group (TMG.io), remote - *Senior frontend developer*

January, 2023 - Present

Typescript | Javascript | Vue | Docker | Node | Mentoring

- Programming with: typescript, vue.js 3, GraphQL.
- Used clean architecture software design philosophy.
- Backlog refinement and planning.
- Daily participation.
- Bugfix champion.
- Code review.
- Helping interviewing new possible candidates
- Micro frontends building

Mercadolibre Colombia, remote and presential - *Senior software engineer*

March 2021 - January 2023

Typescript | Go | React | Docker | Node | Mentoring

Senior Software Engineer for Mercado Pago.

- Programming.
- Planning, estimation and refinement of backlogs.
- Application monitoring.
- Helped in technical interviews.

-
- Micro frontends building
 - Mentoring new talents.
 - Processes documentation and also technical documentation.
 - Helping interviewing new candidates
 - Intense problems solution: hard work to solve many issues on a big web app used by internal users of Mercado Pago, assisting in many meetings in order to find solutions with the team, this helped me to show my communication skills.

Golang

- Developed many backend solutions for a big web app used by internal users of Mercado Pago.
- Developed a library for using an internal API more easily and to share a common information standard between apps.

React

- Developed many frontend solutions for a big web app used by internal users of Mercado Pago.

Typescript

- - Worked on typescript libraries used in the frontend to solve some bugs.

Mentoring

- Participated actively on frequent meets to share knowledge about Golang, React, Vue, Typescript and helped new talents to know about the business and tech stack.

Summa Solutions, Argentina, remote - *Fullstack developer*

July 2020 - March 2021

Kubernetes | Mentoring | Magento 2 | Javascript | PHP | Python | MySQL | Docker | AWS | Laravel | Node

Fullstack developer, in charge of the following tasks:

Magento:

- Version upgrades.
- Custom checkout personalization.
- Landing pages development.
- Shipping methods integration development with third party external logistic solution Pickit.
- Payment method development with third party external payment software.
- Integrations with: Auth0, Oneclick y Tienda Envios (a software made with Laravel).

Python:

- Worked on Scripts for automated processes.

Scrum:

- Active participation in planning, refinement.

Aws:

- Deploys to production using Kubernetes.

Docker:

- Configuring and using Docker on a daily basis to develop new features for the company.

Also did some good documentation about things like: magento upgrade, known magento issues and how to solve them, tips to patch a module on magento 2.

Opera Inversiones Urbanas S.A.S, Bogotá, Colombia presential - *Web developer and Ecommerce technician*

July 2018 - April 2020

Vue | React | Go | Magento 2 | Javascript | PHP | Python | Mysql | SQL Server 2016 | Amazon EC2 | Node.js | Mentoring

Sole Web developer and Ecommerce technician for a big project in Colombia, this was my biggest opportunity at that time to show my previous skills using Magento.

Created a Magento 2 system with multi website for www.bohofoodmarket.com and www.bohoexpo.com:

- Did a Magento 2 Module to synchronize product information for more than 20k in products: I connected this module to a third party external software called ICG (the source of information).
- Did personalizations on every page of the Magento 2 platform for both websites: blogs, checkout, products, catalog, categories.
- Teached a small group of customer support to use the website and helped in many cases.

Created a vue.js 2 web app www.bohouliving.com. to collect students information.

Created some simple gathering forms web apps in react.js for the company.

Did scripts for microsoft SQL Server 2016:

- Automated business reports: sales, buy.
- Marketing email programs.

Created a business intelligence web app using Python Flask and Vue 2:

- Graphical sales reports using chart.js library.
- Used pandas library for python to analyze this data.

Used Amazon Web Services for many things like:

- Serving static content using cdn.
- Used EC2 to deploy servers for staging and production environments.

Microsoft SQL Server 2016

- Script development for marketing automation..
- Script development for sales reports, purchases and financial reports.

Used Golang as backend language for a script to backup sales reports files and important information for the company into Google Drive.

Develoop Software, Spain, remote - *Web developer*

August 2017 - July 2018

Javascript | PHP | MySQL | Woocommerce | Prestashop

Developer for websites based on Prestashop, Magento 1 and Wordpress, did the following tasks:

- Creation of Ecommerce from scratch based on Prestashop.
- Web development for Magento 1.
- Web development for Prestashop.
- Web development for Woocommerce.

ALBA Corporation, Caracas, Venezuela, presential - *Web developer*

August 2016 - July 2017

CodeIgniter | PHP | MySQL | Woocommerce | Prestashop

Developer for marine hardware company, where I did things like:

- Web client developed in PHP using CodeIgniter Framework, also connected this backend to Amazon Business API to upload product information.
- Development of Magento 2 website from scratch for business with more than 257k products online.
- Development and maintenance of Woocommerce sites.

Proseguros, Caracas, Venezuela, presential - *Web developer*

August 2015 - August 2016

Javascript | PHP | MySQL | Node | Wordpress | Oracle | PL SQL

Did the following tasks:

- Development and maintenance of corporate intranet, developed using Wordpress PHP and Javascript.
- Web Design, graphical design using Adobe Photoshop.
- Development on Oracle using PL/SQL .

FORMATION

Americo Vespucio Technological Institute (IUTAV) - *Senior computer technician*

2012 - 2015

Learned about PHP, JAVA, VISUAL BASIC, Systems analysis. My final project was creating an Android App to do queries to product, categories and more important information for a prestashop website.

El Cristo private educational unit - *Bachelor of Science*

2005 - 2010
